

Three Pin Plates Set for 40mm Shaft

Part Number #820000400

Easy to integrate into your workflow, Coats pin plates are essential, versatile, and promote accurate balancing.

Pin plates accurately position wheels on the balancer shaft to maximize the performance of your balancer and wheels.

Durable, plastic gears rotate and make the pins adjustable to fit a wide range of bolt patterns. The replaceable gear plates will not bend if the pin plate is dropped and will simply snap back in.

The set includes three pin plates - for 4, 5, and 6 lug wheels - and multiple tip lengths and styles for different sized lug nuts.

Compatibility

All Coats 40mm Shaft Balancers

Full Kit
